Anticancer Drug Resistance Advances In Molecular And Clinical Research Cancer Treatment And Research
The novel opens with Aunt Polly scouting the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects soberly on Tom’s misbehavior and how she lets him get away with too much.

Tom comes home at supper time and is praised for his good behavior. He tells his father about his adventures. During supper, Aunt Polly is satisfied, but Tom’s half-brother, Becky Thatcher, makes a scene about Tom’s education and eventually chases the newcomer all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Tom passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of money. He almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his task.
The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out tearfully, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom’s mischievous and how she lets him get away with too much.

Tom comes home at supper time in a very good mood. He has just learned from his teacher that he will be skipped school that afternoon and won’t have to do his homework that night. Meanwhile, Tom’s erstwhile friend and rival, Huckleberry Finn, has been wandering and exploring, having decided to take a break from school. Tom and Huckleberry are both eager to explore the new world and eventually chase the newcomer all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get Jim to do some of the whitewashing in return for a "white ally," a kind of大街脚. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.
Anticancer drug resistance advances in molecular and clinical research

Anticancer drug: Anticancer drug, any drug that is effective in the treatment of malignant, or cancerous, disease. There are several major classes of anticancer drugs; these include alkylating agents, antimetabolites, natural products, and hormones. In addition, there are a number of drugs that do not fall within...

The regulation of oxidative stress is an important factor in both tumour development and responses to anticancer therapies. Many signalling pathways that are linked to tumorigenesis can also...

Modulation of oxidative stress as an anticancer strategy...

An international, peer-reviewed, Open Access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventative strategies to minimize the development and spread of resistance.

Infection and Drug Resistance - Dove Press Open Access...

The systematic translation of cancer genomic data into knowledge of tumour biology and therapeutic possibilities remains challenging. Such efforts should be greatly aided by robust preclinical...

The Cancer Cell Line Encyclopedia enables predictive...

Resulting from the above discussed advantages of natural products, in spite of the predominant industrial focus on HTS approaches with synthetic compound libraries, natural products still represent a valuable source for drug discovery (Newman and Cragg, 2012). Plant-derived natural products approved for therapeutic use in the last thirty years (1984–2014) are summarized in Table 1.

Discovery and resupply of pharmacologically active plant...

These unique features make MSNs excellent candidate for controlled drug/gene delivery systems. Since the first report using MCM-41 type MSNs as drug delivery system by Vallet-Regi et al. 8 in 2001, the research on biomedical application of MSNs has steadily increased, with an exponential rise in last decade. Various mesoporous materials with different porous structure and functionality have...

Mesoporous silica nanoparticles for drug and gene delivery...

Chemotherapy (often abbreviated to chemo and sometimes CTX or CTx) is a type of cancer treatment that uses one or more anti-cancer drugs (chemotherapeutic agents) as part of a standardized chemotherapy regimen. Chemotherapy may be given with a curative intent (which almost always involves combinations of drugs), or it may aim to prolong life or to reduce symptoms (palliative chemotherapy).

Chemotherapy - Wikipedia

Antiviral drugs are a class of medication used specifically for treating viral infections rather than bacterial ones. Most antivirals are used for specific viral infections, while a broad-spectrum antiviral is effective against a wide range of viruses. Unlike most antibiotics, antiviral drugs do not destroy their target pathogen; instead they inhibit their development.
