Translational Research In Traumatic Brain Injury Frontiers In Neuroscience
The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects warmly on Tom’s mischief and how she lets him get away with too much.

Tom comes home at supper. He is covered with dirt and bears the telltale sign of his recent escapade. His clothes are torn and muddy, and his hair is untidy. Aunt Polly is exasperated and asks what he has been up to. Tom tells her how he won several prizes at the fair and how he almost got a second place in the geography contest. Aunt Polly is satisfied.

Tom and the new arrival edit a newspaper and eventually choose the newspaper all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Ian passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alley,” a kind of salary. Ian almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his trolley.
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. A few days later, Aunt Polly reflects calmly on Tom's mischief and how she lets him get away with too much.

Tom comes home at supper-time. He has not been skipping school that afternoon, and Aunt Polly has been skipping breakfast. She is very pleased with her brother-in-law and wonders how he has fared in the frontier. Aunt Polly is satisfied, but Tom's half-brother has the habit of being home late from school. Tom has sworn to himself to disguise his guilt.

Tom goes out of the house in search of Benjy, or "the boy," whom he has been looking for all day. He/backgrounds and acquaintances. Tom and the new arrival are both strangers to the town, and Tom tries to make the new boy feel welcome. When Tom returns home in the evening, Aunt Polly is waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a kind of money. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.
Translational Research in Traumatic Brain Injury

Traumatic brain injury (TBI) remains a significant source of death and permanent disability, contributing to nearly one-third of all injury-related deaths in the United States and exacting a profound personal and economic toll. Despite the increased resources that have recently been brought...

Rhode Island's Biomedical Community Teams Up to Accelerate Translational Research in Traumatic Brain Injury

On average, 1.7 million Americans sustain annually some form of traumatic brain injury (TBI).

Translational Research in Traumatic Brain Injury attempts to integrate expertise from across specialties to address knowledge gaps in the field of TBI. Its chapters cover a wide scope of TBI research in five broad areas: Epidemiology. Pathophysiology. Diagnosis. Current treatment strategies and sequelae. Future therapies.

Translational and clinical research that is funded by NIH, DoD...

Progesterone for Traumatic Brain Injury: Experimental Clinical Treatment

No effect of progesterone • No improvement in outcome • No statistical differences between groups.

Translational Approaches to Brain Injury Treatment

The broad goal of this project (known by the acronym TRACTS) is to characterize the psychological...

Today our large research group consists of two general components: The Geriatric Neuropsychology Laboratory (GNL) and the Translational Research Center for Traumatic Brain Injury and Stress Disorders (TRACTS).

Heartbrain - Harvard University

Traumatic brain injury (TBI), a form of acquired brain injury, occurs when a sudden trauma causes damage to the brain. TBI can result when the head suddenly and violently hits an object, or when an object pierces the skull and enters brain tissue.
